Team total = mean of the three individual subtotals + one team closing score. Under the default weights this is $85 + 15 = 100$. Blanks are incomplete; zero must be explicit. Exact arithmetic determines the decision before display rounding.

Majority mode counts each eligible judge once. Aggregate mode compares the declared panel average. An exact tied scorecard in majority mode needs a reasoned choice. A tied panel remains unresolved under the accepted procedure.

Provisional results allow 15 minutes for procedural correction. A human official must finalize after open protests are resolved. Audience Choice is separate from the official result and awards.
