

Professor quick guide

Create on one familiar page, publish for Admin approval, then run the room.

SIMPLE ENTRY

Any signed-in Due Diligence account can open the Professor door. No separate Professor-role approval is required.

THE FLOW

Professor creator: one scrolling page with upload, AI numbering, questions, roster, safety, and Publish.

Build the exam

- Enter title, subject, date, start time, and duration.
- Upload a source file or add questions directly.
- Review every AI-numbered question before publishing.

Stay in control

- Confirm roster and accommodations.
- Choose real names by default or optional anonymous grading.
- Choose Standard, Focus monitoring, or available proctoring.

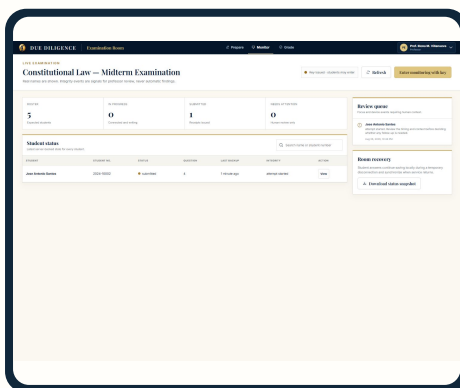

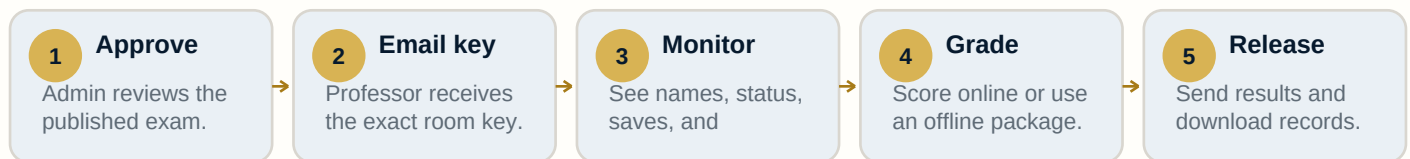

Run, grade, and release

The room becomes usable after Admin approves the published exam and issues the exact key.

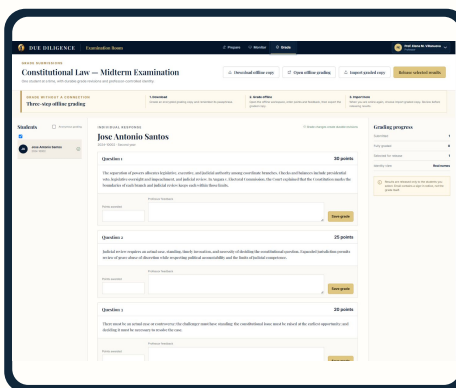

AFTER PUBLISH

Wait for the Admin email. It contains the room key for you to share with your students.

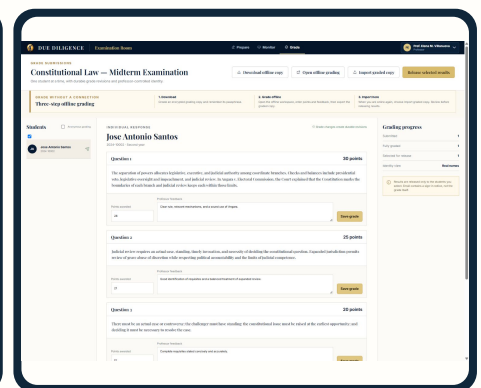

THE FLOW

Monitor real names and submission state.

Grade answers online or open offline grading.

Release selected results and retain records.

Run the room

- Share the exact key only with the intended class.
- Use Monitor to follow in-progress and submitted students.
- Review integrity signals as context; they do not auto-penalize.
- Download a room-status snapshot when needed.
- Open Grade as submissions arrive.

Grade, release, download

- Download the encrypted offline grading package.
- Grade without internet, then export the completed package.
- Import once; repeated imports do not duplicate revisions.
- Save scores and comments; revise when necessary.
- Release results and download grade records for your files.
