

Approve and operate every room

One command center for keys, lifecycle, recovery, questions, answers, and grades.

Start here

1

Review

Open Admin > Examination Room. Select a creator's published examination and review its stored version.

2

Approve

Approve and generate the student key. This is the final activation step and immediately unlocks Creator Monitor and Grade.

3

Deliver

Copy or email the visible key to the creator. Keep the Admin copy available for support and recovery.

4

Operate

Inspect the room, questions, students, answers, grades, delivery, and recovery; rotate, revoke, close, or delete when needed.

Key issuance is immediate activation. Do not ask the creator to enter a key or perform a separate Open room step.

ROOM

Close room

LIFECYCLE

Block examinationDelete examination

Current exact-key and lifecycle controls remain visible inside the selected examination.

If something interrupts the flow

- Email unavailable

Copy the visible key and send it through the school's approved channel; the room remains active.
- Key problem

Refresh status, then rotate or revoke the key. Never edit the examination version to repair a key.
- Delete safely

Delete removes the room from active workspaces while its recoverable record remains preserved.
