

Create, monitor, and grade

A familiar one-page workflow for every signed-in creator.

Start here

1 Open

Sign in, choose Examination Room, then enter the Creator door. No professor-role approval is required.

2 Build

Add questions directly or upload a source. Set duration, navigation, identity, admission, and optional safeguards.

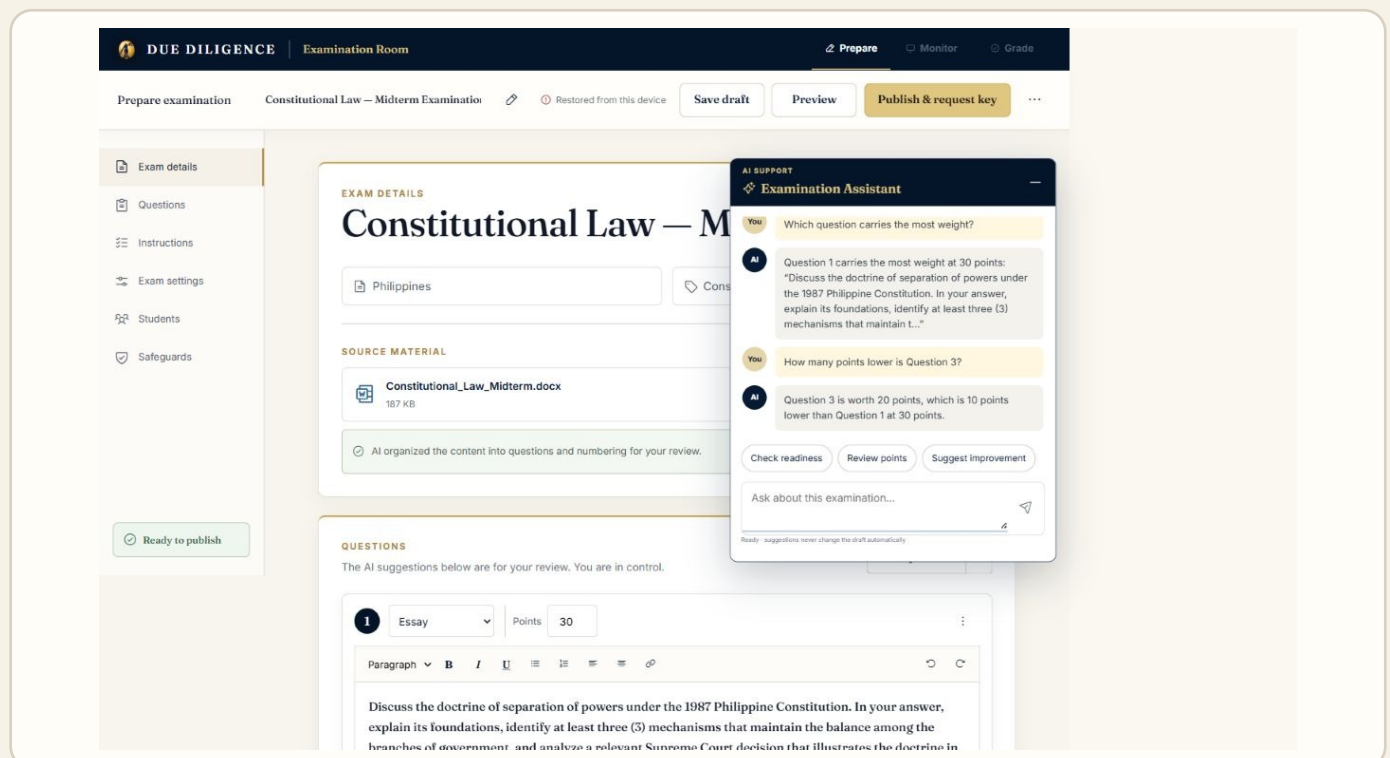

3 Publish

Save as often as needed. Preview, publish, and request the student key when the examination is ready.

4 Run

After Admin approval, Monitor and Grade unlock automatically. Share the student key, monitor, grade, and release.

Admin approval and key issuance are the final activation step. The creator never enters the key or opens the room separately.

Current creator page: questions, controls, and the contextual Examination Assistant stay together.

Create, monitor, and grade

The complete flow

DUE DILIGENCE | Examination Room Prepare Monitor Grade Prof. Elena M. Villanueva

LIVE EXAMINATION
Constitutional Law — Midterm Examination
Real names are shown. Integrity events are signals for professor review, never automatic findings.

If something interrupts the flow

No dates required

The active student key controls entry; there is no creator date or start-time field.

Default admission

Anyone with the student key may enter. Use the optional email list only when you need it.

Connection loss

Student answers continue saving locally and synchronize when service returns.
